ANNUAL MEETING OF THE ALUMNI, June 15, 1882.

EXAMINATION FOR ADMISSION, October 4, 1882.

FALL TERM begins, Wednesday, October 4, 1882.

VACATION DAYS, Christmas and New Years.

WINTER TERM begins, Tuesday, January 2, 1883.

VACATION, the last week in March, 1883.

SUMMER TERM begins, Monday, April 2, 1883.

ANNIVERSARY EXERCISES, June 11, 12, 13, 14, 1883.

COMMENCEMENT DAY, Thursday, June 14, 1883.

Membership.

For membership in the Institution a person must have a good moral character, and must sign a pledge to abstain from the use of all intoxicating drinks and tobacco in every form, while a member of the school. Good health being necessary for success in study, it is expected that none who are permanently weak or diseased will apply for admission. The Institution has had a good reputation for healthfulness, and the interests of the people for whom it was founded demand that this reputation should be maintained.

Pupils from other schools must present certificates of honorable dismissal.

Applications for admission should be made at least a month before the beginning of the school year.

Pupils should enter the first day of a school year that they may be immediately classified, and thus lose no time. Students lose their membership when absent one month. During vacation, as well as during term time, students are held amenable to the authority of the school.
Those who have not a fixed purpose to improve their time, and an earnest desire to fit themselves for usefulness, should not seek admission, as the presence of such is not tolerated.

The Institution is not sectarian in its religious instruction or influence, while aiming to be thoroughly Christian. It is open to all students of either sex.

**Expenses.**

<table>
<thead>
<tr>
<th>Service</th>
<th>Monthly Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Board, including furnished rooms, fuel, lights, and washing</td>
<td>$10.00</td>
</tr>
<tr>
<td>Tuition, in College Course</td>
<td>2.00</td>
</tr>
<tr>
<td>Tuition, in all other Courses</td>
<td>1.00</td>
</tr>
<tr>
<td>Instruction in Instrumental Music</td>
<td>1.00</td>
</tr>
<tr>
<td>Use of Instrument one hour per day</td>
<td>1.00</td>
</tr>
</tbody>
</table>

All payments must be made in advance on the first day of each month.

All pupils are required to work for the Institution at least one hour a day. This requirement makes the above low charges possible.

Remittances in payment of bills should be made by money-orders, drafts, in registered letters, or by express.

Make money-orders and drafts payable, during 1882-83 to H. Burnstead, and address all moneys to him. Receipts will be promptly returned.

**Student Aid.**

Some students have been aided during past years by the Peabody Fund and contributions from the friends of popular education. It is expected that this help will be continued.

Persons should not come expecting to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow.

It is expected that those who are aided will, when able, return the amount to aid others.

**Teaching in Vacation.**

Nearly all of those who are sufficiently advanced in scholarship aid themselves by teaching. The demand for teachers is usually in excess of the supply.
County Superintendents of Schools, and others desiring teachers from this Institution, will find it for their interest to arrange their schools, if possible, so as to include its summer vacation, viz., the months of July, August and September. Communications from all such officers will receive prompt attention.

Students of this Institution, desiring to teach, will be furnished certificates of membership and standing. As a means of protection against imposition, applicants for schools claiming to be from Atlanta University should be required to exhibit such certificates.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end. Earnest efforts are made to induce young men to prepare for the ministry.

Graves Library.

By the liberality of the late R. R. Graves, Esq., of New York, and a few other friends, the library now contains nearly five thousand volumes. Mr. Graves also gave a permanent endowment of five thousand dollars, which secures its steady growth.

In connection with the Library is a Reading Room, well supplied with the leading papers and periodicals of the country, and to both the students have free access.

Apparatus.

A good beginning has been made in procuring Philosophical Apparatus. Enough has been obtained for illustrating some of the simpler principles of Natural Science, and also instruments for Surveying and Engineering purposes.

An excellent telescope and microscope have been added during the present year, secured largely by the gifts of friends.

Music.

Facilities for instruction in both Vocal and Instrumental Music are ample. The elements of Vocal Music are taught from Dr. Mason’s Music Charts, without extra charge.

For practice in Instrumental Music, there are four organs and two pianos. (See expenses.)
Industrial Training.

Young women are taught various branches of household science, such as plain sewing, cooking, and nursing the sick.

Young men are taught some of the principles of farming and gardening by an experienced farmer connected with the Institution.

Some money having been given for the purpose, it is expected that an amply furnished industrial department will soon be opened, where young men can learn some of the more common trades.

Government.

Discipline is administered with firmness and impartiality, and aims to induce a high moral sentiment which shall be in itself a powerful governing force in the school.

Suspension from school is resorted to when other means of correction fail.

When students are exposing themselves to permanent harm, it is expected that high-minded individuals will be governed by the dictates of conscience and common-sense, rather than by any false sense of honor, in regard to disclosing the facts to the proper authority.

Miscellaneous Suggestions.

Each pupil should bring a Bible. It is needed for private reading, for the Sunday-school, and for the weekly Bible lesson.

It is well to bring the text books formerly used.

All should be provided with warm clothing.

Young women should have rubbers and waterproofs.

Economy and good taste demand plain and simple clothing. Parents are urged to co-operate with teachers in seeing that none other is worn.

No extra dress is required for the close of the school.

Letters should be directed to Atlanta University, Atlanta, Ga.

Experience has taught that much evil comes from pupils receiving food from home. They are, therefore, not allowed to receive it. Friends will please not send it.

Students who do not board at their homes are not allowed to board out of the Institution, except by special permission.

Boarders are expected to furnish their own towels.

Keeping or using fire arms on the premises is forbidden.
During term-time students shall not, without permission, actively participate in any political or mass meeting.

Students from a distance should arrange their journeys so as not to arrive on the Sabbath, as they will not be admitted on that day. When going away, they should apply for dismissal in season to arrive at home before the Sabbath.

Students are not allowed to make visits on the Sabbath, and their friends are earnestly requested not to call upon them on that day.

The Institution is the result of benevolent efforts, and that it be decidedly religious in its influence, without being sectarian, is the reasonable expectation of its friends. Among the appropriate means for securing such results, the Sabbath, with its religious services, is most important. The excitement of visiting friends prevents, in a great measure, the benefit that may be derived from a proper observance of the day.

It is desired to make the school, as far as possible, a home for those who attend. Not only their intellectual, but also their physical, social, moral, and religious culture, receive careful attention.

Buildings.

The buildings are situated on high ground in the western part of the city, and are surrounded by about sixty acres of land belonging to the Institution.

DORMITORIES.—During the summer of 1869 a plain, four storied, brick building was erected, containing sleeping rooms for about forty pupils, and also a parlor, dining-room, kitchen, etc. It was designed for a girls' dormitory, but, during the first year, furnished all accommodations, both school and boarding, for boys and girls. It was much crowded, and the inconvenience of the arrangement was very great. In August of 1870, another building of the same style, but larger, containing sleeping-rooms for about sixty boys, besides temporary school-rooms, was completed. In the summer of 1871 this building was enlarged by a wing, providing rooms for about forty additional pupils, and other school-rooms. This entire building is now heated by steam. In the summer of 1880, a portion of the gift of Mrs. Stone, of Malden, Mass., was used in erecting a wing to the first named building. This wing provides for fifty additional pupils, and has a large study hall.

STONE HALL.—This building, now (June, 1882) in process of erection, stands between the two dormitories, and is the gift of Mrs. Valeria G. Stone, of Malden, Mass. It is to contain the chapel and library; the school-room, recitation and lecture rooms for the more advanced students; the philosophical and chemical laboratory; offices, etc. It is expected to be ready for occupancy some time during the coming school year. This building and the two dormitories are to be heated by steam from one large engine.
PROJECTED BUILDINGS.—It is hoped that during the present year a building may be erected for the use of the Graded School, thus giving it greater advantages as a practice school for the Normal Department. It is also planned to enlarge the girls’ dormitory, and to erect a new barn for the better development of the farm work of the Institution.

Funds.

The school being without endowments, is dependent upon the American Missionary Association for all support not derived from other sources. The Legislature of Georgia, in 1870, appropriated to this school $8,000. The same amount was received in 1871 and in 1873. In 1874 a bill was almost unanimously passed making an annual appropriation of $8,000. The bill was entitled “An act equitably to adjust the claims of the colored people to a share of the Agricultural Land Scrip.” It made the appropriation on condition that the Board of Visitors of the University of Georgia should also visit this school; that the money should not be paid by the Governor till a commission of three members of the Faculty of the University of Georgia had approved the plan of the Trustees for the expenditure of the money, and that the school should educate, free of charge for tuition, one pupil for every member of the House of Representatives, to be nominated by the members. The Constitutional Convention of 1877 recognized the constitutionality of such legislation.

By the recommendation of Hon. G. J. Orr, State School Commissioner, the Trustees of the Peabody Fund have for several years appropriated $1,000 annually for Normal Scholarships.

Wants.

Our needs are such as young Colleges have—endowments, scholarships, reference books, maps, apparatus, etc.

It is hoped that the time is not far distant when funds will flow into the treasury of the Institution as freely as they do into colleges in other parts of the country.

The Work of our Pupils.

Nearly all the graduates, and many others who have left before finishing their course, are engaged in teaching during a part or all of the year. Besides these, during the three months of the summer vacation a large number of students engage in teaching, and it is estimated that over ten thousand children in Georgia are taught, annually, by those who have been connected with this Institution.
Report of the State Board of Visitors.

ATLANTA, June 20, 1881.

At the hour appointed, the sub-committee delegated by the Board, to-wit: W. C. Wilkes, R. J. Willingham, J. H. Fitten and J. M. Pace repaired to the Atlanta University, where we were cordially met by the President, Professor Edmund A. Ware, A.M., and other teachers. The President promptly furnished us with a catalogue of the school, and a programme of exercises for the whole week. We were then conducted into a spacious school-room, well furnished with patent desks, large maps, teachers' desks, etc. Here Professor F. W. Smith was examining in Greek—Demosthenes—an interesting class of young men. The examination, which was oral, was excellent, and the committee being invited to do so, examined the pupils rigidly. The class was then examined on the composition, derivation, analysis and synopsis of some of the most difficult verbs, and the application of important rules of grammar. The examination of an advanced class in moral science by Professor Cyrus W. Francis, was eminently practical and satisfactory. So were the recitations in Latin, botany, map drawing, arithmetic, United States history, physiology, music and gymnastics.

The examination on Tuesday in Algebra, Latin, Greek, English literature, mental arithmetic, general history, English Grammar, etc., were very satisfactory. We must speak in terms of commendation of the lesson with criticisms by the senior normals.

On Wednesday the examination of the classes in chemistry, geometry, general history, botany, Milton, etc., was very creditable both to pupils and teachers. Several pieces in vocal and instrumental music were rendered with precision and ease. The programme of the day closed with gymnastic performance with the wand.

The rooms are clean, comfortably furnished and well ventilated. We learned that, last year, the number of boarders was about 40, [the report should have said 160.] this year about 200. The accommodations in this department have been enlarged by the erection of a new edifice of brick about 40 by 60, and four stories high.

Every pupil works one hour each day in the dining and cook room. The neatness and good order of the pupils could not fail to arrest the attention of the visiting committee. They were all clean and neat in their apparel, polite to each other and to visitors, and very obedient to their teachers. Not a mark of pencil or ink could be seen upon the walls, nor of a knife upon the desks or furniture, nor of tobacco upon the floor. Everything looks neat as a new pin. The campus is beautifully carpeted with grass and clover, and the walks are laid off with taste and kept very clean.
A beautiful library of 6,000 volumes affords ample facilities to the pupils and faculty for information upon the whole range of the sciences, and upon every species of polite literature.

A reading room is accessible by the pupils, supplied with valuable periodicals, daily, weekly and monthly.

The Faculty, we believe, are faithful to their important trusts, and well qualified to instruct their classes in their respective departments. The President, Professor Edmund A. Ware, possesses tact, energy and administrative ability, which eminently fit him for his responsible position.

Cook and dining rooms. The committee was gratified on visiting these apartments to observe how clean and well arranged were all the cooking utensils, the crockery, the tables, and everything pertaining to the culinary department. There seemed truly to be "a place for everything, and everything was in its place."

The specimens of bread which we were invited to inspect and to test, were excellent. To say we never saw better bread better cooked—rolls, doughnuts, light bread, tea cakes, pound cake, jelly cake, etc.—all by the pupils, may seem to be extravagant, but such is our candid opinion.

We feel that we cannot too highly commend to our colored people the facilities here offered for normal instruction. Pupils are not only taught the various arts and sciences, but are taught how to teach. One or more experts are here from one of the best normal schools in the United States to drill the pupils in the most approved methods of imparting instruction.

Specimens of drawing by the pupils were spread out upon the walls of the school rooms, for the inspection of the committee. A number of them were elegant, and showed a decided talent and taste for the fine arts.

On Thursday, 16th of June, the exercises of commencement day occurred. The speeches and essays were well prepared and well delivered before a very large and orderly congregation. The President awarded diplomas and certificates of scholarship to a large class, nearly all of whom will go forth to impart to others the instruction here received.

The committee take great pleasure in communicating to the President of the Board of Visitors expressions of great satisfaction at the conditions and prospects of the Atlanta University.

Respectfully submitted,

W. C. Wilkes, Chrm Sub-Committee;
R. J. Willeingham,
J. H. Fitten,
J. M. Pace.

On motion, the above report was adopted by the whole Board of Visitors at a called meeting, held in Atlanta, June 20th, and ordered to be transmitted to the Governor.

H. H. Jones, President Board of Visitors.
Garfield Scholarship.

The following circular was sent last December to many of the graduates and other friends of the Institution:

ATLANTA UNIVERSITY,
ATLANTA, GA., December, 1881.

The teachers and scholars of our Institution have undertaken to establish a scholarship in memory of the late President Garfield.

We hope to raise one thousand dollars, and invest it so that the income can be used each year to help some student. For this purpose we are making a series of thirty weekly offerings at our Friday afternoon prayer meeting. The majority of us are giving one cent a week; some are giving two cents, three cents, or five cents a week, and a few are giving larger sums. Besides thus raising the money for the scholarship for others to enjoy, we hope to gain a spiritual benefit for ourselves, by cultivating the habit of regular and systematic giving. We have not urged any one to give much, but we have urged many to give a little. One cent a week from each of our two hundred scholars would give us, in thirty weeks, sixty dollars as a nest-egg for the scholarship. In previous efforts of this kind we have always succeeded even better than that.

In our present effort we wish to get the help of our graduates, past students, and other friends of the school in Georgia and other parts of the Southern field. The North has done much to help us in our work thus far. Cannot the Garfield scholarship be established mainly, if not wholly, by the efforts of those who are personally connected with the educational work in the South, either as teachers or pupils?

It is hoped that you will be able to join in this effort, both personally and also by enlisting your scholars in it, if you are now teaching. Ask them to give one cent a week, or five cents a month, if more convenient, and get as many to do this as possible. Do not ask them to PLEDGE themselves to do anything, but simply to make up their minds to help so far as they can, and then encourage them to keep this resolution.

Any further information that may be desired will be cheerfully given by the undersigned, to whom the money may be sent when collected, and by whom it will be publicly acknowledged.

H. BUMSTEAD,
Treasurer of Atlanta University.

The following amounts have been received for the Garfield Scholarship up to June 7, 1882:

MASSACHUSETTS.
Wellesley, Miss May Chase, .................. $ 2 00

DISTRICT OF COLUMBIA.
Washington, Mrs. Fannie J. Bradshaw, ............ 5 00
### GEORGIA.

Concerning Endowments.

[The following appeal from the officers of the American Missionary Association is inserted here as being of interest to the friends of Atlanta University.]

The success already achieved by the institutions of this Association and the favor already won by them among all classes of the Southern people, amply justify the work hitherto carried on. It is believed that the time has fully come when this work should be put upon a more substantial basis. Permanent endowments are needed that these institutions may achieve that larger success which is rightly expected of them.

Certain phases of our work, sometimes overlooked, greatly emphasize this need. Careful attention is invited to the following points:

1. THE UNUSUAL DIFFICULTIES ATTENDING THE SUCCESSFUL PROSECUTION OF OUR WORK.—It is no ordinary school teaching that we have undertaken to carry on in the South. Our pupils bring to the class-room absolutely no inheritance of scholarly mind. Only two or three generations separate them from the heathenism of the most uncivilized continent in the world. Some of them come with the most meagre vocabulary—a few hundred tattered and torn remnants of English words. Many of them have no equipment of general information, such as other children absorb from their parents. But worse than all is the evil inheritance which many of our pupils bring from centuries of heathenism and slavery. Let us be frank and add that even the great boon of freedom, so righteously conferred, has, by the very suddenness of its bestowal, unavoidably brought peculiar peril and damage to many of the freedmen.

It is not a light task to deal with such material as this. Moral character must be developed at the outset and carefully nurtured all along. The rubbish of incorrect speech must be cleared away, and a correct and copious vocabulary formed. The commonest facts of general information
must be imparted. Of course, in our higher institutions there is less of such work to be done; but a still more responsible and difficult task takes its place—that of preparing college and normal students to perform this same arduous primary work as teachers and leaders of their own people. Never was such a mass of ignorance thrown so suddenly upon the educational resources of a civilized people. But there is a brighter side.

2. The unprecedented facilities now available for the prosecution of our work.—Never was a civilized people so well prepared as our nation now is to meet this great emergency. The progress made in the science of education was never so great as it has been in recent years. The adaptation of methods of teaching to the varying necessities of pupils was never so well understood as now. Text-books and school apparatus, juvenile literature and helps for Biblical study were never so excellent as at present. The value of industrial training, even as an element in the most liberal culture, is receiving unwonted emphasis. In short, the accumulated wisdom of the latest and best century stands ready to serve us, if we only summon its aid. Much of it is in service already; but far more is needed than our present financial resources can command.

3. The necessity of a high order of talent in the teachers and managers of our work.—To understand thoroughly the needs of such pupils as crowd our schools, and to apply successfully the most approved educational methods, requires something more than an ordinary teacher. An eminent advocate of popular education has stated it as his belief that the most interesting and valuable improvements yet to be made in pedagogical science will be made in connection with the education of the colored people. But tyros and bunglers in teaching will never give us much that is interesting or valuable. The very best teaching ability must continually be employed in our schools and colleges, and be properly remunerated.

4. The relation of our work to the future of education in the South.—The justification of all Northern missionary teaching in the South has been that it was designed to accomplish what the Southern people were not prepared to do themselves. To whatever extent they may in the future take up our work, it will still be our mission to maintain that helpful leadership which it has been our privilege to exercise from the beginning. Our institutions should be the best and do the best work of any in the South. We should be the first to discern the peculiar needs of Southern pupils and the first to introduce whatever is new and excellent in educational appliances. We ought, for instance, to have at once industrial departments connected with all our larger institutions. Every normal and college graduate should be able to use intelligently either the wood-working or the iron-working tools; and the same expenditure of time and money which the Harvard and Yale boys make in learning to wield the oar and the bat would accomplish this much desired end. Our institutions are being visited by teachers eager to witness the advanced
methods of teaching already introduced. We should always be able to reward such visitors by showing them something which they have not seen before. Above all, we should send out from our institutions such noble specimens of young manhood and womanhood as shall prove a stimulus to the whole educational work in the South.

The destiny of the colored race is to be largely determined by the character of the young men and women now crowding forward into active life. The immediate future will demand all our resources, and more, to save these young people. In the more distant future, our success as influential leaders in education will depend largely upon the promptness with which our institutions are now put upon a substantial basis. Every consideration of past success and of present and future need enforces our plea that these endowments should be provided at once.

HON. WM. B. WASHBURN, President.
REV. M. E. STRIEBY, D. D., Cor. Sec'y.

H. W. HUBBARD, Esq., Treasurer.
