TRUSTEES

FOR ONE YEAR

FOR TWO YEARS

Mr. William B. Matthews, A. B. . . . Atlanta, Ga.

FOR THREE YEARS

Hon. Rufus B. Bullock . . . . . . . . Atlanta, Ga.
Mr. Harvey Edward Fisk, A. B. . . . New York, N. Y.

FOR FOUR YEARS

Mr. Hugh Young . . . . . . . . . . New York, N. Y.

EX-OFFICIO

President—Horace Bumstead
Vice-President—C. Cuthbert Hall
Secretary—Frederick H. Means
Treasurer—Myron W. Adams

Executive Committee: Finance Committee:

Daniel Merriman; William H. Davis; Arthur C. Walworth; Edward C. Moore; Horace Bumstead
Arthur C. Walworth; William H. Davis; Edward C. Moore; Frederick H. Means; Horace Bumstead
OFFICERS AND INSTRUCTORS

REV. HORACE BUMSTEAD, D. D.,
President.

REV. MYRON W. ADAMS, Ph. D.,
Professor of Greek and Dean of the Faculty.

THOMAS N. CHASE, A. M.,
Professor of Latin.

EDGAR H. WEBSTER, A. M.,
Professor of Science and Principal of Normal Department.

W. E. BURGHARDT DU BOIS, Ph. D.,
Professor of Economics and History.

REV. EDWARD T. WARE, A. B.,
Chaplain.

GEORGE A. TOWNS, A. M.,
Professor of Pedagogy.

GEORGE K. HOWE, B. S.,
Instructor in Mechanic Arts and Superintendent of Shop.

MISS IDELLA M. SWIFT,
Instructor in Mathematics.

MISS JULIA A. ELLIS, A. B.,
Instructor in Literature and Composition.

MISS MABEL D. HANCOCK, Ph. B.,
Instructor in High School Branches.

MISS HELEN KNOWLTON, A. B.,
Instructor in Greek and Latin.

WALTER D. SMITH,
Business Manager.

REV. ROBERT M. COATE,
Superintendent of Printing Office.

MRS. LUCY E. CASE,
Honorary Matron.

MRS. ANNA H. BUMSTEAD,
Northern Secretary.
MRS. ADRIENNE McNEIL HERDON,
Teacher of Elocution.

Miss LIZZIE A. PINGREE,
Matron in South Hall.

Miss M. PAULINE SMITH,
Teacher of Domestic Science and Matron in Housekeeping Cottage.

Miss HATTIE E. CLIFFORD,
Teacher of Music.

Miss ELLA L. DEANE,
Teacher of Sewing and Dressmaking.

Miss FRANCES B. CLEMMER,
Local Secretary.

Miss CAROLINE L. CONARY,
Matron in North Hall.

Miss CATHARINE T. JOHNSON,
Superintendent of School Room.

Miss MARY E. LANE,
Librarian and Bursar.

Miss ALEXCENAH THOMAS,
Supervisor of Primary Work, and Critic Teacher, in the Oglethorpe School.

Miss GERTRUDE H. WARE,
Supervisor of Kindergarten Work, in the Oglethorpe School.

Miss ANNIE G. COPELAND, M. D.,
Preceptress in North Hall.

*Mrs. KATHARINE WARE SMITH,
Northern Secretary.

Miss VASHTI N. DAVIS,
Assistant in the Oglethorpe School.

Miss G. VIRGINIA PERRY,
Assistant in the Oglethorpe School.

*Served a part of the year.
COURSES OF STUDY

There are three courses of study: the College, the Normal, and the High School. The last of these has two parallel divisions, the College Preparatory and the Normal Preparatory.

The High School

For admission to this course a thorough examination must be passed in Spelling, Geography, United States History, Grammar, and Arithmetic as far as Mensuration. Certificates showing attainment may be given to those who complete this course with credit.

*The studies of the First Year are designed to prepare those who have finished the grammar grades of the public schools to take up the work of the Second Year. Average students with good preparation can do this in one year, taking the Latin, Algebra and English. Students with defective public school training must often take two years for this work.*
College Course

For requirements for admission to this course see p. 9.

Freshman

Greek (b), (c) 5
Algebra (b), Geometry (c) 4
Latin (e) 4
Literature (d), Elocution (c) 4

Sophomore

Greek (d) 5
German 5
Latin (f) 3
Geometry (c), Trigonometry 4

Junior

Argumentation, Bible (b), Elocution (d) 5
Chemistry (b), Geology (a) 5
History (b) 4

Olyics (b), Economics 3

Senior

Sociology 4
Physics (b), Astronomy (a) 5
Psychology, Ethics 3
French or Pedagogy 5

Normal Course

For admission to this course, a student must have finished the work of the Normal Preparatory course, or its full equivalent.

Junior

(Industrial training required throughout year.)
Astronomy (b) (½ year), Geology (b) (½ year) 3
School Hygiene (½ year) 3
Arithmetic (½ year) 5
Elocution (e) (½ year) 1
U. S. History and Civil Government 4
Kindergarten and Primary Methods (½ year) 3
Bible (c) (½ year) 3
Drawing (½ year) 1

Senior

(Teaching in Model School required throughout year.)
Literature (e) 8
Geography (½ year) 4
Elocution (f) (½ year) 1
Ethics (½ year) 2
English Grammar (½ year) 5
Music (½ year) 2
Psychology and General Method (½ yr.) 5
History of Education and School Organization (½ year) 5

Technical Course

The Trustees have voted to establish, in case the necessary financial provision can be made, a Technical course of two years, with the same requirements for admission as the Normal or College course; those completing this course to receive diplomas and be reckoned as graduates of the Institution.
Post-Graduate Course

The following information is given concerning the conditions which must be met by candidates wishing to receive the degree of A. M. from Atlanta University.

1. Post-graduate work is under the supervision of a standing committee, composed of the Dean and two other members of the Faculty.

2. It is the duty of this committee to admit candidates to registration, oversee their work, and recommend such as they approve to the Faculty as suitable candidates for the degree of Master of Arts.

3. Candidates shall select their courses of study under the supervision of this committee. In the case of non-resident, as well as resident candidates, instructors for each course shall be designated by the committee.

4. Forty credits shall be necessary to the granting of a degree, this being equivalent to four courses during one year of resident work, or to an approved number of courses during at least two years of non-resident work.

5. In the case of non-resident students it is expected:

(a) That a minimum of two hours a day for 104 weeks will be given to the study.
(b) That written quarterly reports be submitted regularly to the committee on graduate work, stating in detail the work done.
(c) That a written thesis be submitted at the end of the first year's work.
(d) That a written examination be passed at Atlanta University before the conferring of the degree.

In imposing the above conditions the committee may take such account as they think proper of work already done by the student before registration. The Trustees have authorized the granting of credit for advanced work, either as student or teacher, in other schools of high rank. Application for credit, for work done before registration, must be made to the Dean, and must be explicit and in detail.

6. The courses of study open to graduate students, subject to the approval of the committee, shall be:

(a) Any of the advanced courses given in the catalogue which the student has not had.
(b) Any other practicable courses suggested by the standing committee or the candidate.

7. The fee is $16.00, i.e., the same as the college tuition for one year. The diploma is $5.00 additional.

Two Fellowships have been established by the Trustees, open to post-graduate students. Holders of these fellowships will have part of their time for study, and will also, for a moderate compensation, be assigned to certain work as teachers or assistants of teachers.

Further particulars can be learned from the Dean of the Faculty.
ENTRANCE REQUIREMENTS

It is our especial wish to co-operate with the secondary schools and the public school system in this section, carrying on the work where they leave it. We receive by certificate graduates of those secondary schools which carry their pupils as far as our third year in either the Normal or College Preparatory course. Students who come from schools of lower rank are examined and classified according to their attainments. Those who have completed the usual Georgia public school course are ordinarily presumed to be able to pass the examination for our first year classes.

For the more specific information of those desiring to take our College course, there have been formulated the following:

College Entrance Requirements

1. GREEK.—(a) As much as is covered in White’s First Greek Book, omitting the English exercises after the first thirty lessons.
(b) Xenophon’s Anabasis, book I, chapters I, II and VI to X.

2. LATIN.—(a) Fundamental principles, as in Taull and Fowler’s elementary book.
(b) Two books of Cesar, five orations of Cicero, three books of Virgil, together with Latin Grammar.

3. BIOLOGY.—(a) Botany, as much as is covered by Bailey’s Botany. An herbarium of fifty specimens. Laboratory note-book may be offered for any number less than fifty.
(b) Physiology, as much as is covered by Walker’s Physiology.

4. PHYSICS.—(a) The equivalent of any good, modern text-book on the elements of physics (Carhart’s, Hall and Bergen’s, or Gage’s is suggested) and laboratory experiments (Harvard University entrance experiments are suggested). In case a candidate has done laboratory work, he will be expected to present his note-book.

5. MATHEMATICS.—(a) Arithmetic, complete, including the metric system. (No certificate will cover requirements in arithmetic).
(b) Algebra. College algebra (such as Wentworth’s) to quadratics.
(c) Geometry. Plane geometry, five books. It is expected that candidates will have given attention to construction of original demonstrations.

6. ENGLISH.—(a) Composition. Candidates for college must be able to write English that is correct in respect to spelling, grammar, idiom, punctuation, and division into paragraphs. Scott and Denney’s Elementary Book and Buehler’s Practical Exercises in English are suggested texts. The elements of English versification will also be required.
(b) Literature will be required as follows: (1) Acquaintance with the masterpieces of the leading English authors from Chaucer to Arnold, such as are found in George’s Chaucer to Arnold. (2) Careful study of Eliot’s Silas Marner, Macaulay’s Essays on Milton and Addison, and Burke’s Speech on Conciliation with America.
(c) Bible. Candidates for the Freshman class are expected to be familiar with such parts of the New Testament as are outlined in the Bible Study Union Lessons on the History of the Apostolic Church.

7. HISTORY.—Requirements in history are as follows: Outlines of Hebrew, Greek, Roman, French and English history, and the history of the United States. (Myer’s General History, chapters 9-40, and sections on England and France in the remaining chapters, and Channing’s United States History, indicate the approximate amount of work required).

8. INDUSTRIAL TRAINING.—Boys: Wood-working, 144 hours; iron-working and free-hand drawing, 120 hours; mechanical drawing, 120 hours.
Girls: Sewing, 144 hours; drawing, 90 hours; cooking, 60 hours; dressmaking, 60 hours.

NOTE.—No equivalent will be accepted for the work as outlined above in the following subjects: Latin, Greek, Physics, Mathematics, English, (a and b). Equivalents for all other subjects will be accepted.
DEPARTMENTS OF INSTRUCTION

Nor. classes—Jun., Sen.
High School classes—Coll. or Nor. Prep., I, II, III.
No. of exercises in parenthesis.

I. CLASSICS AND MODERN LANGUAGES

GREEK. (a) Coll. Prep. III (80). The mastery of the more important forms, using Goodwin's Grammar and Moss's Greek Reader. (b) Coll. Prep. III and Fresh. (60). Drill in Xenophon's Anabasis. (c) Fresh. (128). Selections from Homer, and from either Lucian or Herodotus. (d) Soph. (160). This year the class reads Demosthenes, from the Olynthiacs and Philippics, Thucydides, and Euripides's Alcestis.

LATIN. (a) Coll. and Nor. Prep. I (160). This year is devoted to mastering the elements of the language. The Roman method of pronunciation is used, long and short vowels are carefully distinguished, and in all written work long vowels are marked. Pupils become very familiar with inflections and the main principles of syntax. Special stress is laid upon translating from English into Latin and much written work is required.

During the next two years—(b) (c) (d) Coll. Prep. II and III (96, 96, 96)—the time is about equally divided between Cæsar's Commentaries, Cicero's Orations and Virgil's Æneid. Literal translations are avoided and good idiomatic English is required, while at the same time students are expected to know the exact meaning of each word in the form in which it stands. All the Virgil is scanned and in scanning each syllable has its proper time and the ictus is not made prominent. A large part of Allen and Greenough's grammar is read and a few of the most important statements are memorized.

In the College course—(e) (f) Fresh. and Soph. (128, 96)—six subjects are selected from the writings of Cicero, Ovid, Curtius, Livy, Pliny and Tacitus. These are read as literature and attention is given to style and subject matter. Some constructive grammar work is done. Roman history and literature are studied incidentally in this course and more fully in the general courses in history and literature.

GERMAN. Soph. (160) This is taught during the first part of the time by conversation in the class-room, the use of the Joynes-Meissner Grammar, and translations from Joynes's Reader. The latter part of the time is given to the reading of a German classic with some attention to the literature and civilization of Germany. The last class read Schiller's Wilhelm Tell.
FRENCH. Sen. (elective with Pedagogy) (160). Chardenal's Complete French Course, and the stories L'Abbe Constantin and Gil Blas represent the work done in this course.

II. PHYSICAL AND NATURAL SCIENCES

PHYSICAL GEOGRAPHY. Coll. and Nor. Prep. I (80). The work is illustrated by specimens and apparatus selected from cabinets.

BIOLOGY. (a) Physiology. Coll. and Nor. Prep. II (48). Special attention is given to temperance and hygiene. (b) Botany. Coll. and Nor. Prep. II. (48). This subject is taught objectively. Each student prepares an herbarium of thirty specimens carefully analyzed and mounted. The Institution owns a good microscope. The course in botany also aims to introduce the study of elementary agriculture. (c) Zoology. Nor. Prep. III (elective) (48). This subject is illustrated by a fairly good cabinet of the lower forms of animal life.

PHYSICS. (a) Coll. and Nor. Prep. III (96). Elementary. The time is divided between class-room work and individual laboratory experimentation, one triple period weekly being given to the latter. The laboratory experiments are fifty in number, and include physical measurements, mechanics of solids and fluids, heat, sound, light and electricity. (b) Sen. (112). Advanced. Two triple periods weekly are spent in laboratory work, and two in lectures, demonstrations or recitations in the class-room. In the year 1904-05 the number of experiments was fifty.

CHEMISTRY. (a) Nor. Prep. II (96). Elementary. The method of this course is largely laboratory work, to which three periods a week are devoted; while two periods are given to class exercises. (b) Jun. (112). Advanced. There are three class periods and two triple laboratory periods weekly. The work covers the ground of general chemistry and includes the study of the non-metals, the metals, the metallic groups and their separations, and the determination of the acid radicals, and the determination of unknowns containing one metal and one radical.

ASTRONOMY. (a) Sen. (48). This class pays special attention to mathematical astronomy. The text-book is Young's. (b) Jun. (48). Todd's text-book is used. The institution owns a good telescope.

GEOLOGY AND MINERALOGY. (a) Jun. (48). This course includes dynamical and structural geology, followed by an outline of historic geology. Sufficient insight into mineralogy is given to make the student acquainted with the more common minerals and the rock constituents of the earth's crust. (b) Jun. (48). A course similar to the above.

LABORATORIES AND CABINETS. The physical laboratory, 50x20 feet, and the chemical laboratory, 50x25, are fitted and furnished for the elementary and advanced courses. A well equipped science lecture room is furnished with apparatus for class demonstration and lecture purposes.
Recently additions have been made to apparatus, particularly in the lines of light and electricity; among these additions may be mentioned a spectroscope, an oxy-hydrogen lantern, and an induction coil especially adapted to demonstrate the X-ray.

The geological and mineralogical cabinets are well adapted to teaching purposes, especially in dynamical and structural geology.

### III. MATHEMATICS

**ARITHMETIC.** Nor. Prep. III (80). Review and applications. See also under Pedagogy.

**BUSINESS METHODS.** Nor. Prep. III (48). Designed to give the student a general knowledge of business forms and the keeping of accounts.

**GEOMETRY.** (a) Coll. Prep. III (112). Plane geometry, five books, much attention being given to construction of original demonstrations. (b) Nor. Prep. III (80). The most important principles of plane geometry. (c) Fresh. and Soph. (112). Solid and spherical geometry, with problems, and some drill in analytical geometry.

**TRIGONOMETRY AND SURVEYING.** Soph. (64). Plane and spherical trigonometry, with practical applications, including spherical astronomy; and surveying, with field practice, for which the school possesses good instruments.

### IV. ENGLISH

**COMPOSITION.** Coll. and Nor. Prep. I (also in all other English, and many other courses) (112). These first year classes, after a review of English Grammar, make a brief study of description, narration, exposition and the simplest forms of argument. Most of the time is given to actual practice in writing. The revised edition of Lewis’s First Manual of Composition is the text-book used. During the second High School year themes are required upon the studies in English literature. During the first part of the third Normal Preparatory year the students write daily themes, using Buehler’s Exercises for a text and Hill’s Principles of Rhetoric for a reference book. Longer compositions upon the study of literature are required in the latter part of the year. Similar drill is given in connection with the study of literature in the Freshman and Senior Normal years.

**LITERATURE.** (a) Coll. and Nor. Prep. II (96). The whole field of English literature is surveyed, beginning with Chaucer and ending with Arnold. The aim is to have the students form an acquaintance with all the reputable English authors by reading extracts from the best productions of those authors. (b) Nor. Prep. II (elective) (48). A few of the best prose selections from such American writers as Hawthorne, Irving and Cooper, are read and a large amount of of English and Amer-
ean poetry is committed to memory. (c) Nor. Prep. III (144). Especial
attention is paid to prose, as Silas Marner, Ivanhoe, House of Seven
Gables. At least one long poem like the Princess, and one of Shake­
speare's plays are read during the year. (d) Fresh. (112). Several
typical novels are read, and also complete prose selections from the fol­
lowing authors: Bacon, Swift, Addison, Lamb, De Quincy, Carlyle,
Emerson, Macaulay, Ruskin and Arnold. Supplementary lectures are
given upon the art of composition. (e) Sen. (96). A course similar to
the preceding. The library is well provided with material for study in
English literature.

ARGUMENTATION. Jun. (96). The subject is pursued in both a theo­
retical and practical way. The theory is developed in the use of a
text-book and the practice is secured by writing six forensics. Each
of the briefs and forensics is corrected by the instructor and revised
or rewritten by the student.

BIBLE. (a) Coll. and Nor. Prep. (48). Outlines of the history of the
apostolic church are thoroughly mastered by these classes with the
use of the Bible Study Union lesson system. (b) Jun. (48). Kent's
History of the Hebrew People is made the basis of a detailed study
of the Hebrew prophets. (c) Jun. (48). This class makes a special
study of Old Testament history, following the outline of the Bible
Study Union.

ELOCUTION. Instruction in this subject, including vocal expression,
voice training, pantomime and exercises from the Swedish gymnastics,
is given twice a week for one term to each of the following classes:
The teacher is a graduate from the Normal course, who was also
graduated with especial honor at the School of Expression in Boston.
She not only gives class instruction, but also individual drill to stu­
dents who appear in public exercises.

PUBLIC RHETORICALS. Rhetorical exercises, to which the public is
especially invited, are held six times a year, being made up of orations,
theses, essays, recitations and music.

V. PHILOSOPHY

PSYCHOLOGY. Sen. (84). The text book used, James's shorter course,
is supplemented by lectures and experiments. See also Pedagogy.

ETHICS. (a) Sen. (32). The theoretical aspects of the subject are
especially studied, the text book being supplemented by lectures. Col­
ateral reading and a thesis are required of each member of the class.
(b) Sen. (32). Especial study of the practical aspects of the subject,
only so much of ethical theory being given as is necessary to find
principles upon which applications may be made.

VI. SOCIOLOGY AND HISTORY

It is intended to develop this department not only for the sake of the
mental discipline, but also in order to familiarize our students with the
history of nations and with the great economic and social problems of the world. It is hoped that thus they may be able to apply broad and careful knowledge to the solving of the many intricate social questions affecting their own people. The department aims, therefore, at training in good, intelligent citizenship; at a thorough comprehension of the chief problems of wealth, work, and wages; at a fair knowledge of the objects and methods of social reform; and at a general comprehension of the world's thoughts and deeds. The following courses are established:

ECONOMICS. Jun. (48). A course in economic theory and history with especial reference to the Negroes. Theses and field work. Bullock's and other text-books are used.

SOCIOLOGY. Sen. (128), and SOCIOLOGICAL LABORATORY. The laboratory consists of a special library of books on statistics, economics, sociology and history, with duplicate copies of standard works; and of maps, charts and collections illustrating social and historic conditions. Here the Senior class is given a course of one year which is devoted to the study of social conditions and methods of reform with especial reference to the American Negro. Field-work and thesis work are required.

In addition to this, graduate study of the social problems in the South by the most approved scientific methods is carried on by the Atlanta Conference, composed of graduates of Atlanta, Fisk, and other institutions. The aim is to make Atlanta University the center of an intelligent and thorough-going study of the Negro problems. Nine reports of the Conference have been published, and the tenth is in preparation.

The library contains a good working collection of treatises in history and sociology, and special reports on outside reading are required in all these courses.

VII. PEDAGOGY

While the Normal Course is distinctively a course preparatory to teaching, definite instruction in pedagogy is not confined to it. The subject is elective in two of our Normal Preparatory years, and in the Senior College year. In recent years all of our college students have taken the subject before graduation.

ELEMENTARY. (a) Nor. Prep. II (elective) (48). (b) Nor. Prep. III (elective) (48). The subject of primary methods is studied, including an outline of psychology and the principles of education.
SCHOOL ORGANIZATION AND GENERAL METHOD. (a) Sen. (elective) (160). This course deals with school management and organization, which includes the planning of courses of study for elementary and secondary schools, the consideration of educational values, the history of education, and the discussion of the problems peculiar to the common schools of the South. (b) Sen. (80); a course in psychology and general method. (c) Sen. (80); a course in the history of education and school organization.

THE OGLETHORPE SCHOOL. In this school—described under BUILDINGS—is given an opportunity to engage in the actual work of teaching, and to observe such work, under thoroughly competent supervisors. The organization in 1904-05 included four grades and a kindergarten. This will be enlarged in 1905-06.

VIII. MUSIC

VOCAL Music. This is required of all the Normal and High School students. The lower classes receive elementary instruction while the upper classes have practice in chorus singing. Individual vocal instruction is given in special cases. The music on Commencement day is furnished by the students. During the Senior Normal year special instruction in vocal music is given from the standpoint of Pedagogy.

INSTRUMENTAL Music. Instruction on the piano and organ is given at a reasonable charge, for which see EXPENSES. Six pianos and four organs are owned by the Institution. Recitals are given during the year by the pupils in the department.

IX. INDUSTRIAL TRAINING FOR BOYS.

All the boys in the High School receive instruction at the Knowles Industrial Building—for a description of which see BUILDINGS—the equivalent of five or six periods each week. One year is devoted to wood-working; one-half year to forging; one-half year to free-hand drawing; and one year to mechanical drawing, including architectural and machine drawing.
First Year. Wood-working (144 hours). In the bench room are twenty benches and vises—each bench being fitted with a case of woodworking tools—and ten wood-turning lathes. All boys begin their industrial work here, and are instructed in the general principles of woodworking: marking, sawing, planing, boring, chamfering, mortising, tenoning, grooving, mitering, beveling, dovetailing. All students are advanced through a series of carefully graded exercises, which are fully shown by working drawings and models of the same. Wood-turning is introduced in the latter part of the year. The course follows a series of graded working drawings, and at its completion useful and ornamental articles can be made. Practice is given during the latter part of this year and the first half of the second year in the care and management of engine and boiler.

Second Year. Iron-working (60 hours). The forge room is fitted with twelve forges and anvils, and is thoroughly supplied with small tools suitable for doing ordinary blacksmith work and small machine forging. Instruction is given in heating, drawing, bending, upsetting, welding, annealing, tempering, etc.

Free-hand drawing (60 hours). The fundamental principles are taught by drawing from models, also the principles of shading, thus teaching the student to represent truly what he sees. Practice is given in lettering in the latter part of the year.

Third Year. Mechanical drawing (120 hours). In this subject the students take up the use and care of instruments, and the principles of orthographic drawing, including development of surfaces, and intersections. A short course in machine drawing includes the draughting of parts of machinery from sketches previously made. The course in architectural drawing consists in making plans and the necessary details for a house.

FOR GIRLS

Instruction is given to all girls in the High School and Normal courses in sewing, dressmaking, cooking, and household management; the more advanced work being assisted by residence and practice in the Model Home.

Sewing

First Year. 72 hours. Instruction is given in basting, backstitching, running, overcasting, hemming, oversewing, French seam, outlining, patching, felling, gusset, napery stitch, combination stitch, tucking, gathering and binding, buttonholes, hemming and whipping ruffle. Pillow-cases and aprons are made.

Second Year. 72 hours. Different kinds of darning, drafting, cutting and making undergarments, plain machine work. Girls can buy garments at cost.

Third Year. 60 hours. Hemstitching, featherstitching, cutting and making shirt waist suits.
Junior Year. 60 hours. Dressmaking. Students are expected to be prepared to buy a chart for drafting, also to buy an inexpensive woolen dress, linings and trimmings, for practical work.

Cooking

Third Year. 60 hours. The care and management of a fire, the structure of the stove, the washing of dishes and cleaning of boards and closets are given careful consideration. The chemistry of cooking is illustrated by simple experiments and then given practical application in the cooking of eggs, meats, vegetables, cereals, batters, doughs, soups, etc.

Junior Year. The members of the Normal course spend a portion of their time in the Model Home, where practical instruction in cooking and housekeeping is given.

Drawing

It is intended to add to our present work in this subject 48 hours in each of the first two years of the High School course.

Printing Office

There is a well appointed printing office in South Hall, in which typesetting, newspaper, book, and job work are taught by an experienced superintendent. Two monthly papers are published: one by the Institution, The Bulletin of Atlanta University; one by the students, The Scroll. We also print the annual catalogue and the Conference report. Job printing is done by student labor.

The office was moved to South Hall in the fall of 1903, and is equipped with a Mietz & Weiss gas engine, one Colt’s Armory press, 14x22, one Gordon press, 8x12, one 32-inch power cutter, Acme stapler, 100 fonts of job type and 1,000 pounds of body type.
GENERAL INFORMATION

LOCATION

The University grounds are at the head of West Mitchell street, a little more than one half mile from the new union passenger station. Electric cars, marked "WEST HUNTER, ASHBY ST.," leave the corner of Marietta and Broad streets every half hour, run near the union passenger station, and directly past our gate.

MEMBERSHIP

Good health being necessary for success in study, it is expected that none who are permanently weak or diseased will apply for admission. The Institution has a good reputation for healthfulness, and the interests of the people for whom it was founded demand that this reputation should be maintained.

Application for admission should be made at least a month before the beginning of the school year, and should state, fully, previous education and present plans.

Students should enter the first day of the school year, that they may be immediately classified, and thus lose no time in beginning work.

Students lose their membership in class when absent one month.

During vacation, as well as during term time, students are held amenable to the authority of the school.

The Institution is not sectarian in its religious instruction or influence, while aiming to be thoroughly Christian. It is open to all students of either sex.

GOVERNMENT

Discipline is administered with firmness and impartiality, and aims to induce a high moral sentiment, which shall be in itself a powerful governing force in the school.

When it becomes plain that a pupil has not a fixed purpose to improve his time, and an earnest desire to fit himself for usefulness, he is removed without specific charges.

Suspension and expulsion from the Institution are resorted to in cases whose seriousness calls for such punishment.

When students are exposing themselves and others to permanent harm, it is expected that high-minded persons will be governed by the dictates of conscience and common sense, rather than by any false sense of honor in regard to disclosing the facts to the proper authorities.
EXPENSES

Boarding, including furnished rooms, fuel, lights, and washing, per month ........ $10.00
Tuition in College and Normal courses, per month ........ 2.00
Tuition in High School course, per month ........ 1.50
Instruction in Instrumental Music, per month ........ 1.50
Use of instrument one hour per day, per month ........ 50
Instruction in Vocal Music, per month ........ 2.00

All payments are due in advance on the first day of each calendar month. Fractions of a month are charged at a somewhat higher rate.

In case girls do their own washing in the Institution laundry, an allowance from the above charges for board will be made.

All boarding pupils are required to work for the Institution at least one hour a day. This requirement helps to make the above low charges possible.

Remittances in payment of bills should be made by money order, drafts, in registered letters, or by express.

Make money orders or drafts payable to Atlanta University. Receipts will be promptly returned.

STUDENT AID

Some students have been aided during the past year by contributions from the friends of popular education. It is expected that this help will be continued.

The income of the King, the Cassedy, the Wm. E. Dodge, the Hastings, the Boyd, the Plainfield, the Garfield, the Melissa P. Dodge, the Coburn and the Wm. E. Dodge Education Scholarship Funds is now available.

Persons should not come expecting to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow. In no case is aid granted for a longer time than the current year, without renewed application. Those who are aided are assigned to some extra work. It is expected that they will, when able, return the amount to aid others.

TEACHING IN VACATION

Quite a number of the students in this Institution aid themselves by teaching. Those who desire to do this will be furnished certificates of membership and standing.

County School Commissioners, and others, desiring teachers from this Institution, will find it advantageous to arrange their schools, if possible, so as to include its summer vacation. Communications from all such officers will receive prompt attention.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end.
GRAVES LIBRARY

By the liberality of the late R. R. Graves, Esq., of New York, and a few other friends, the library now contains about eleven thousand volumes. Mr. Graves also gave a permanent endowment of five thousand dollars, since increased to six thousand, which insures its steady growth. It has been completely catalogued according to the Dewey system.

In connection with the library are two reading rooms, well supplied with the leading papers and periodicals of the country, and the students have free access to these, as well as to the library.

For the Carnegie Library, see BUILDINGS.

THE ATLANTA CONFERENCE

Atlanta University recognizes that it is its duty as a seat of learning to throw as much light as possible upon the intricate social problems affecting the American Negro, both for the enlightenment of its own graduates and for the information of the general public. It has, therefore, during the last nine years sought to unite its graduates, the graduates of similar institutions, and educated persons in general throughout the country in an effort to study carefully and thoroughly certain definite aspects of the Negro problems.

BUILDINGS

The buildings are situated on high ground, in the western part of the city, and are surrounded by about sixty-five acres of land belonging to the Institution.

DORMITORIES

There are two principal dormitories, the one used by the girls having been erected in 1869, with a wing added in 1880. This building contains the school kitchen and dining-room. The dormitory used by the boys was built in 1870, with a wing added in 1871. Each of these buildings contains a parlor, reading room, and gymnasium. They also have a complete system of sanitary plumbing, with bath-tubs supplied with hot and cold water.

STONE HALL

This building, erected in 1882, stands between the two dormitories, and is a gift of the late Mrs. Valeria G. Stone, of Malden, Mass. It contains the chapel and library, the large school-room, recitation and lecture rooms, the physical and chemical laboratories, offices, etc. This
building, the two dormitories and the domestic science building are heated by steam, from one plant.

KNOWLES INDUSTRIAL BUILDING

This building, erected in 1884, is for the use of the mechanical department. It is a memorial of the late Mr. L. J. Knowles, of Worcester, Mass., whose widow appropriated from his estate $6,000 for its erection, this amount being increased by the gifts of a few other friends.

The rooms in this building contain twenty cabinet benches, with wood-working tools; ten wood-turning lathes; two power jig saws; twelve forges and anvils, with sets of tools; tables and furniture for free-hand and mechanical drawing; a Morse engine lathe, upright drill and emery grinder; and a fifteen horse-power engine, cut-off and rip-saws, pony planer, grindstone, benches, and tools for general use.

DOMESTIC SCIENCE BUILDING

This building, also known under the more formal name of “The King’s Daughters’ Model Home and Maria B. Furber Cottage,” was erected in 1899 from contributions which had been slowly gathered during a number of years, chiefly from circles of King’s Daughters in many parts of the country and from personal friends of the late Mrs. Maria B. Furber, wife of the late Rev. Dr. Daniel L. Furber of Newton Centre, Mass., who, himself, made generous additions to the building fund previous to his death. It contains dormitory rooms for at least seventeen occupants, who carry on all the work of the home without servants, and is equipped with facilities for teaching the domestic arts in the most thoroughly scientific as well as practical manner.

THE OGLETHORPE SCHOOL

This building, erected in 1904, is the gift of the General Education Board of New York and of its Treasurer, Mr. George Foster Peabody, each contributing the sum of $5,000, and of a large number of other friends who contributed a third sum of $5,000. The building contains ten rooms besides a large basement, and is used for practice teaching in connection with the Normal Department, special attention being given to the training of kindergarten teachers as well as teachers for the public schools.

CARNEGIE LIBRARY

This building (begun in April, 1905, and to be ready for occupancy in October) is the gift of Mr. Andrew Carnegie, who contributes $25,000 for its erection and furnishing. It is to contain a fire-proof stack room, large reading and reference rooms, a lecture room, picture room, rooms for unpacking, travelling libraries, etc.

FUNDS

The University has thus far received but a very small part of the endowment needed to carry on even its present work, to say nothing of future growth. The invested funds now on hand are as follows:
### FOR ENDOWMENT

<table>
<thead>
<tr>
<th>Fund</th>
<th>Amount</th>

<tr>
<td><strong>Total of Permanent Funds</strong></td>
<td><strong>$50,189 19</strong></td>
</tr>
</tbody>
</table>

It will be seen from the above statement that, proportionally, the funds for general endowment are in greatest need of increase. For the present, the Institution is almost wholly dependent upon annual donations from the benevolent public for all support not derived from tuition charges, and asks for not less than $30,000 annually for current expenses.

### HONORS AND PRIZES

At the end of their Sophomore and Senior years, honors are awarded to those students who have maintained a certain average rank. The designating phrases used are: With Highest Honor; With High Honor; With Honor. The award at the close of the year 1903-04 was as follows:

**CLASS OF 1904**
- With Honor
  - AnnaDel Chase King

**CLASS OF 1906**
- With Honor
  - Augustus Granville Dill
  - Bazoline Estelle Usher

### CORPORATE NAME

The corporate name of this Institution is, The Trustees of The Atlanta University. Wills containing bequests should be attested by three witnesses in most of the states.
MISCELLANEOUS SUGGESTIONS

Each pupil should bring a Bible. It is needed for private reading, for the Sunday-school, and for use in classes.

It is well to bring text-books formerly used.

Students are required to be furnished with all prescribed text-books at the time when the use of them begins.

All should be provided with warm clothing.

Young women must have rubbers and waterproofs.

The use of silks, velvets, or other expensive or showy dress materials or trimmings is prohibited. Prints, ginghams, and plain worsteds, with inexpensive lawns and muslins for hot weather, are the most appropriate wear.

Parents will do well not to send clothing, unless the request for it is endorsed by the preceptress. No extra dress is required for the close of school. Experience has taught that much evil comes from pupils receiving food or large quantities of fruit, or candy, from home or friends. They are, therefore, not allowed to receive it. Friends will please not send it.

Letters should be directed in care of Atlanta University, Atlanta, Ga.

Students who do not board at their own homes are not allowed to board out of the Institution, unless by special permission.

Boarders are expected to furnish their own towels and napkins.

Keeping or using firearms on the premises is forbidden.

Especial attention is called to the rule prohibiting the use of all intoxicating drinks, and tobacco in every form.

Students should, in all cases, be regularly excused when they leave school, as leaving otherwise is regarded as an offense.

The proper observance of the Sabbath is most important for the moral and religious welfare of the students. This Institution is the result of benevolent efforts, and that it be decidedly religious in its influence, without being sectarian, is the reasonable expectation of its friends. Boarding pupils are therefore required to attend stated religious services. Students should arrange so as not to travel upon the Sabbath, and friends are earnestly requested not to call upon them on that day.

It is desired to make the school, as far as possible, a home for those who attend. Not only their intellectual, but also their physical, social, moral and religious culture receives careful attention.

THE WORK OF OUR PUPILS

The great majority of our graduates, and many others who have left before finishing their course, are engaged in teaching during a part or all of the year. Besides these, during the four months of the summer vacation, a large number of students engage in teaching, so that a very large number of children in Georgia and other states are taught annually by those who have been connected with the Institution.
STUDENTS

College Course

Fellow

Edwin Augustus Harleston .... Charleston, S. C.

Graduate Students

Annadel Chase King .... Atlanta
A. B., 1904. Pedagogy and French.

William Andrew Rogers (non-resident) .... Petersburg, Va.
A. B., 1899. Sociology.

1. Including three graduates from a theological course.
2. Two students graduated in two departments. One in two departments.
THE WORK OF OUR GRADUATES

As an encouragement to prospective students to attend Atlanta University, and to friends of Southern education to support its work, the following more detailed statement is presented showing the marked success our graduates have had in securing not only remunerative positions for their own self-support but also opportunities for the widest usefulness in the work of uplifting their race. The statements are taken, with some revision, from a recently printed leaflet concerning the work of our graduates.

THE COLLEGE GRADUATES

While the one hundred and twenty-four graduates from the college department (including three graduates from a theological course) represent only a small portion of the work done by the University, they represent a very important part of that work, as will be evident from a statement of the positions they occupy and the work they are doing.

Of these one hundred and twenty-four graduates, sixteen have died. Of the one hundred and eight now living, thirteen are ministers, several of whom, however, are classified in our summary as teachers, five are physicians, two are lawyers, one is a dentist, sixty-one are teachers, one is in literary work, thirteen are in the service of the United States, eight are in other kinds of business, and four are students. These statistics, together with those of the normal graduates, are given in tabular form on page 45 of this catalogue.

MINISTERS

One of the ministers is pastor of a Congregational church in Chattanooga, Tenn.; two, who are also teachers, of Baptist churches in Charleston, S. C., and Atlanta, Ga.; three of Methodist churches in Rome, Ga., Baltimore, Md., and Springfield, Mo.; one is chaplain of the Tuskegee Normal and Industrial Institute and dean of its Bible School, and another is his assistant. Another is Secretary of a Y. M. C. A. branch in New York City. All the churches named are centers of great power and wide influence. Some of these ministers have made addresses in national and international assemblages, one is a fellow of the Royal Geographical Society, and one has had the unique honor of being a member of the board of education in a large Southern city for eleven successive years, and is now again a member of the same board.
Many of the teachers are holding high positions. No less than five are college presidents: of Clark University, Atlanta, Ga.; of the Georgia State Industrial College, Savannah, Ga.; of Lane College, Jackson, Tenn.; of Lincoln Institute, Jefferson City, Mo.; and of the Florida Baptist College, Jacksonville, Fla. Another is vice-president of the Colored Agricultural and Mechanical University, Langston, Okla. Another is in charge of the Bible Training School of the Tuskegee Institute. Seven are principals of public city schools. Some of the others are designated as follows: teacher of music in Savannah, Ga.; principal of the Charleston Industrial Institute, Charleston, S. C.; principal of the Howard Normal School, Cuthbert, Ga.; professor of Greek in Morris Brown College, Atlanta, Ga.; vice-principal of State Normal and Industrial College, Prairie View, Texas; principal of Knox Institute, Athens, Ga.; principal of Industrial School, Fort Valley, Ga.; professor of pedagogy in Atlanta University; professor of natural science in the State Normal School, Frankfort, Ky.; principal of the Georgia Normal and Industrial Institute, Greensboro, Ga.; principal of Walker Baptist Institute, Augusta, Ga.; professor of science and instructor in the mechanical department in Talladega College, Talladega, Ala.; professor of pedagogy and vocal music in the Colored A. and M. College, Langston, Okla.; professor of sloyd and mechanical drawing in the State Normal School, Petersburg, Va.; professor of mathematics in Texas College, Tyler, Texas.

OTHER PROFESSIONS

The five physicians are located in Denver, Colo., St. Joseph, Mo., Savannah, Ga., Abbeville, S. C., and Atlanta, Ga. All of them were among the very first in their classes in the medical schools that they attended.

The two lawyers practice severally in Boston, Mass., and Augusta, Ga., and are successful in their profession. One is Master in Chancery by appointment of the governor of his state. The one dentist lives in Atlanta and has an extensive practice.

One of these graduates was a lieutenant in the army during the Spanish war, and captain of U. S. Volunteers in the Philippine Islands. Another was paymaster with the rank of major.

CIVIL AND POLITICAL SERVICE

Several of the graduates who are clerks in the United States service in Washington have taken a full course in law or medicine. And when it is considered that this has required several hours of hard work in the evening after a full day at the office, for months and years, one can understand that they have grit and perseverance. Then, three at least have been mail agents on railroads under five successive administrations and have successfully passed the severe examination required and conquered the violent opposition that has arisen against them from various sources.
The peculiar conditions existing in the South have prevented these graduates from becoming prominent in political affairs. Yet one of them has been a member of three successive National Republican Conventions and another has represented his county in the Georgia legislature, while a third has served two terms in the Texas legislature, being elected by the aid of votes of Southern white men in a predominantly white community.

NORMAL TRAINED TEACHERS

Most of these teachers are located in Georgia, but some are in North Carolina, Missouri, Tennessee, Arkansas, Texas, Alabama, Mississippi, Louisiana, Delaware and Florida. Of the sixty-two teachers in the colored public schools of Atlanta, fifty were educated in Atlanta University. Several of these have been in continuous service many years. Two have been in the same school in Savannah since 1876. While most are teaching in public schools, some of them being principals in important positions, a large number are also in private institutions. One is the founder and principal of Haines Normal and Industrial Institute in Augusta, Ga., a large and important school, in which six others of our graduates are assistants; three are teachers in the Morris Brown College in Atlanta, an institution of high grade under the auspices of the African Methodist Episcopal Church; another is the founder and manager of an orphans' home and school in Covington; another is principal of an American Missionary Association school in Marshallville; three are teachers in Tuskegee Normal and Industrial Institute, as also three of our college graduates, while two others are wives of prominent teachers there and participate in the work; another is principal of the Buttrick Training School near Athens, Ga.; another is teacher of elocution in Atlanta University; and still another is at the head of the department of nurse training in Alcorn University, Westside, Miss.

Almost every one of these graduates is a Christian and doing Christian work in the church, Sunday-school and home, and is exerting a strong influence for good in the community in which he lives. They are leaders in temperance organizations, sociological clubs and teachers' associations, and are found in the front ranks of every social reform movement. In a large measure they are moulders of public sentiment and are helping in a quiet way to solve some of the perplexing problems of these troublous times. Although they are reformers in the best sense of the word, they are an eminently conservative social element.
